

## Project Development Phase SPRINT– 4

Date	07 November 2022
Team ID	PNT2022TMID28943
Project Name	IOT based device for child safety monitoring and notification

### NEO-6M-0-001 GPS MODULE

The NEO-6M GPS receiver module uses USART communication to communicate with a microcontroller or PC terminal. It receives information like longitude, latitude, altitude, UTC time, etc. The NEO-6M GPS module can track up to 22 satellites and identifies locations anywhere in the world.
